## Verification:

In address 000B we have stored 5 which denoted 5 elements are to be sorted. The given elements are :

5,3,4,1,2

After sorting in ascending order we get :

1, 2, 3, 4, 5

Through the output, we see we have got the sorted order as 1, 2, 3, 4, 5 which is the same as the desired ascending order. Hence verified that the elements are arranged in ascending order;
